

# *Stop fuel theft now with NeckIt!*

*Fuel theft costs money and is an actual problem. Commonly fuel theft is skimming, or the regular, low-volume fuel theft. This often goes unnoticed by the fleet operator or owner driver even when fuel management systems are used. NeckIt! fits trucks, buses, coaches and vans.*

## ***The unrivalled combination of features of NeckIt! :***

- Security
- Quick-fit Installation
- High-speed Fuelling
- Transferability
- Optional anti-spill safety valve

For additional information, contact your local DAF dealer or look in our TRP catalogue at [www.trpparts.com](http://www.trpparts.com)

# No other system offers the range of benefits of NeckIt!

## Product information

**NeckIt! deters fuel theft by opportunistic thieves - major theft and regular small scale skims.**

**Use NeckIt! and quite simply, once your fuel is in, it is only yours to use.**

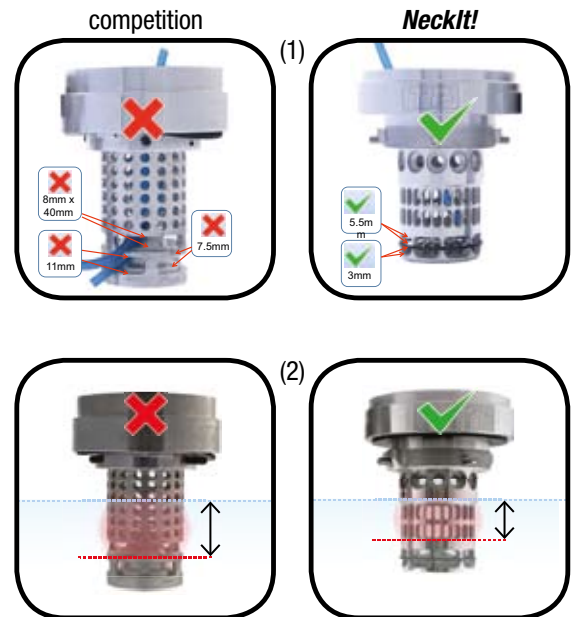

### Features and benefits:

- Small holes to prevent use of regular hoses (1)
- Very short device to stop siphoning in the upper levels of the tank (2)
- Accepts pump speeds of 120 Litres/min without splashback
- Easy to fit with no drilling, gluing or riveting
- Transferable between vehicles
- Cost effective to use with no moving parts to maintain
- Safe with bio-fuels using Viton seals
- Purchase at low price with a very short payback
- Robust and capable of withstanding regular and prolonged use

### StopSpill!

Dangerous diesel spills on roads kill motorcyclists. A missing or damaged fuel cap and a full fuel tank can cause a spill. A tipped truck can cause a spill. **StopSpill!** is the award-winning fuel anti-spill valve and fits inside **NeckIt!** to form the ultimate fuel safety and security device.

TRP Product code	Photo	Product Description
